Marco **Vinciguerra**

LLM AND SOFTWARE ENGINEER

San Francisco, CA, USA

(+39) 3927602999 | mvincig11@gmail.com | marco-vinciguerra-dev.onrender.com/ | VinciGit00 | marco-vinciguerra-7ba365242/

Technical Foundations

Neural Architectures: Transformers (GPT-style decoders, multi-head attention), Mixture of Experts (MoE), LSTMs, sequence-to-sequence models

Training & Fine-Tuning: PyTorch (primary), TensorFlow, scikit-learn; LoRA, reward modeling, reinforcement learning (policy gradients, PPO, GRPO), model quantization

LLM Systems: OpenAI, Anthropic and Gemini APIs, LLaMA, Ollama (local inference), MLX, multi-model orchestration

Software & Infrastructure: Python (expert), TypeScript (frontend and backend), React, Bun, SQL, Docker, AWS (EC2, Lambda), REST API design (FastAPI, Flask), Git, GitHub Actions, Bash scripting

Scientific Computing: Time-series analysis and forecasting, statistical learning theory, spatial statistics, optimization algorithms, interpretability and explainability methods

Distributed Systems: P2P networks for distributed inference and computing

Additional Languages: C/C++, Java, JavaScript, LaTeX

Experience

ScrapeGraphAI — *Remote*

FOUNDER AND CTO — *March 2025 - August 2026*

Main work: Built and shipped the full-stack product: React frontend and TypeScript/Bun backend for LLM-powered semantic web data extraction. Grew to 1,000+ paying customers by August 2026. Raised $1M in venture funding and led a team of five. Open-source adoption: 31k+ GitHub stars, 1M+ downloads, and 1,500+ forks.

University of Bergamo, Department of Engineering — *Milan, Italy*

RESEARCH ASSISTANT AND DATA SCIENCE ENGINEER — *October 2022 - June 2023*

Main topic: Creation of algorithms for spatial data interpolation and gridding for the AgrimOnIA project (). Published dataset with 3000+ downloads on Zenodo.com enabling agricultural ML research

Inxpect S.P.A. — Computer Vision & AI Startup — *Brescia, Italy*

MACHINE LEARNING ENGINEER INTERNSHIP — *July 2023 - October 2023*

Topic: Computer vision for industrial automation developing ML algorithms for automated image classification and labeling at scale. **Main work**: Creation of ML algorithms for image labeling and neural network development from pre-trained models. Transfer learning, data augmentation, model fine-tuning. This company was named by Wired one of the top startups in Italy in 2022 ()

University of Bergamo, Statistical Methods Course — *Milan, Italy*

TEACHING ASSISTANT AND RESEARCH TUTOR — *October 2023 - February 2024*

Main work: Teaching and tutoring in statistical learning for engineering students

Education

University of Bergamo — *Milan, Italy*

MASTER DEGREE IN DATA SCIENCE AND DATA ENGINEERING — *September 2022 - March 2025*

Main subjects: Advanced machine learning, neural networks, optimization algorithms, statistical learning theory. **Thesis:** Scaling LLM-based systems for real-world data extraction and web intelligence (Completed)

Riga Technical University — *Riga, Latvia*

ERASMUS+ RESEARCH EXCHANGE — *January 2023 - July 2023*

Main subjects: Introduction to AI, statistical learning theory, optimization methods, neural networks foundations

University of Bergamo *Milan, Italy*

B.S. in Computer Science and Engineering *October 2019 - July 2022*

Grade: 103/110. Merit Scholarship for academic excellence. **Thesis title**: "Time-series Forecasting and Explainability with LSTM Recurrent Neural Networks: Modeling Air Quality Dynamics Across Lombardy"
Research contributions: (1) LSTM architecture design for temporal sequence learning; (2) Temporal pattern discovery in multivariate environmental data; (3) Interpretability analysis of neural predictions
Repo link: . Award link:

Main subjects: Mathematical analysis, linear algebra, algorithms, theoretical computer science, object-oriented programming

Publications

NeurIPS 2026

ScrapeGraphAI-100k: Dataset for Schema-Constrained LLM Generation *2026*

Large-scale dataset of 100K real-world examples for schema-constrained structured data extraction with LLMs. **Paper:** . **Adoption:** used by TypeSafe as the benchmark dataset for their Jev verifier cookbook ()

Open-Source Projects

All my projects are available on my GitHub account: https://github.com/VinciGit00.

ScrapeGraphAI

Founder and Maintainer - open source LLM research library

Open-source Python library based on LangChain that can run local models with Ollama/Docker, Gemini, OpenAI, or other major LLM models. Allows automatic extraction of structured data from full webpages in seconds. **Impact:** 31.5K+ GitHub stars, 1M+ downloads, 1500+ forks.

Documentation:

NBAStats

Creator - Data Science Visualization Platform

Python open-source web app created with Streamlit for visualizing NBA player statistics and personal performance data. Interactive dashboard for exploratory data analysis. **Demo:**

Recognition & Contributions

2023	**Open-Science Dataset Publication,** AgrimOnIA project: 3000+ downloads on Zenodo; enables agricultural ML research	*Zenodo Research Repository*
2022	**Merit Scholarship for Academic Excellence,** University of Bergamo, awarded for superior academic performance	*Milan, Italy*
2023–2024	**Hackathon Competition Winner,** NOI Techpark (2023, 2024); demonstrates problem-solving under constraints	*Bolzano, Italy*
